Portfolio: https://justinem10281996.github.io/Portfolio_JM/

Full Stack Developer with hands-on experience in building and maintaining scalable web applications using React, TypeScript, Laravel, and MySQL. Experienced in end-to-end system development, collaborating with teams, and delivering internal and client-facing business systems. Focused on clean code, performance, and continuous learning.

Work Experience

Contract Web Developer

Remote | January 2026 to June 2026

- Developed a Document Management System for internal company use.
- Built an Inventory POS / Materials Management System for an SME client.
- Designed inventory tracking modules covering stock monitoring, materials handling, and sales reporting.
- Built full-stack features using modern web technologies.

Junior Programmer

Bangalow Proprietary Limited Company

Philippines, Papua New Guinea, Australia | April 2025 to January 2026

- Contributed to the development and maintenance of internal and client-facing web applications.
- Assisted in implementing features, fixing bugs, and enhancing system performance.
- Collaborated with senior developers to meet project requirements and deadlines.
- Participated in code reviews and followed best practices for maintainable code.

Contract Web Developer

Remote | September 2024 to March 2025

- Developed an HR Management System from scratch for internal business operations.
- Designed and implemented modules including employee records, attendance tracking, and HR workflows.
- Built full-stack features using modern web technologies.

Junior Programmer

Lloyd Laboratories, Inc.

Malolos City, Bulacan | June 2023 to December 2023

- Built and maintained internal web applications for business operations.
- Enhanced system features and resolved technical issues efficiently.
- Worked closely with the development team to meet project milestones.
- Applied coding best practices to ensure maintainable and reliable code

Software Engineer

GP Next Solution, Inc.

Quezon City | November 2021 to January 2023

- Designed, developed, and maintained web applications for external clients.
- Built reusable and efficient front-end and back-end components.
- Collaborated with cross-functional teams on UI, backend logic, and database design.
- Ensured system reliability, performance, and code quality
